

EVERYTHING CONCRETE

BY

Endless opportunities
to develop and manipulate
massing and forms.

Concrete is the most versatile product on earth and is available in abundance. It is a material that can be traced back over 2,000 years. No construction is possible without concrete, but if you think you've seen it all when it comes to concrete products, think again.

Concrete is way beyond just a structural product!

This robust and resilient material also has a beautiful, luxurious side that makes it truly inescapable — a beauty that is not delicate.

At **Liberty Infra**, we decided to go an extra mile to explore the aesthetic side of concrete, creating a synergy between our expertise and the endless imagination of our clients, while also factoring in cost-effectiveness.

We have introduced innovative concrete technology, "Kratos Beton," which is an extremely dense, refined, and ductile concrete with the potential to completely transform the look and feel of our offerings.

"Everything Concrete by Liberty Infra" is a concept based on the philosophy of "You design, we execute."

From concept to creation, we bring your vision to life. Each product is handcrafted in the state-of-the-art production and concrete research centres of Liberty Infra, under the close supervision of our experts, and tailored to meet the unique tastes of designers striving for originality.

After thorough research, our experts have developed a standard range of beautiful three-dimensional cladding in geometric patterns.

3D Geometrical Cladding creates surfaces full of optical effects and inspiring visuals, adding both style and depth. When combined with light, these 3D patterns can create truly stunning impressions.

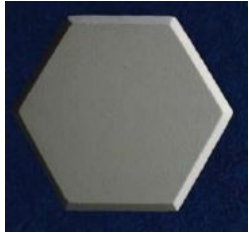

EVERYTHING CONCRETE

A concept based on philosophy
of "you design, we execute".

from concept to creation,
making your vision come true.
